Additive Manufacturing is the peer-reviewed journal that provides academia and world-leading industry with high quality research papers and reviews in additive manufacturing. The journal aims to acknowledge the innovative nature of additive manufacturing and its broad applications to outline the current and future developments in the field.. Additive manufacturing technologies are positioned ...

Particle of any shape with dimensions in the $1 \text{ \AA} - 10^9$ and $1 \text{ \AA} - 10^7$ m range.. Note 1: Modified from definitions of nanoparticle and nanogel in [refs.,].. Note 2: The basis of the 100-nm limit is the fact that novel properties that differentiate particles from the bulk material typically develop at a critical length scale of under 100 nm. Note 3: Because other phenomena (transparency or ...

Solar energy is radiant light and heat from the Sun that is harnessed using a range of ever-evolving technologies such as solar heating, photovoltaics, solar thermal energy, solar architecture, molten salt power plants and artificial photosynthesis.. It is an important source of renewable energy and its technologies are broadly characterized as either passive solar or active solar depending on ...

Rydberg physics is the land of gentle giants Xhighly-excited electronic states where an electron is, on average, far from the nucleus. They are created with a lot of energy, have unusually large size and live relatively long.
