

TREES AND FORESTS FROM ALGAE TO SEQUOIAS THE HISTORY LIFE AND RICHNESS OF FORESTS

trees and forests from pdf

Drunken trees, tilted trees, or a drunken forest, is a stand of trees displaced from their normal vertical alignment.. This most commonly occurs in northern subarctic taiga forests of black spruce (*Picea mariana*) under which discontinuous permafrost or ice wedges have melted, causing trees to tilt at various angles.

Drunken trees - Wikipedia

A forest is a large area dominated by trees. Hundreds of more precise definitions of forest are used throughout the world, incorporating factors such as tree density, tree height, land use, legal standing and ecological function.

Forest - Wikipedia

Trees that once depended on animals like the woolly mammoth for survival have managed to adapt and survive in the modern world.
