center vs. centering | TeXblog

LaTeX is a powerful markup language used for typesetting. I show how to use Notepad++ as a LaTeX editor with a PDF viewer and forward/inverse search.

LaTeX Editing Using Notepad++ - johnbruer.com

MediaWiki renders mathematical equations using a combination of html markup and a variant of LaTeX.. The version of LaTeX used is a subset of AMS-LaTeX markup, a superset of LaTeX markup which is in turn a superset of TeX markup, for mathematical formulae. Only a limited part of the full TeX language is supported; see below for details. By default SVG images with non-visible MathML are generated.

Help:Displaying a formula - Wikipedia

This was closed as off topic. I think it should be migrated to TeX.se. It may not be able to, because it's too old. At the time of its posting it was accepted that LaTeX was a programming language and that such questions were welcome here.
