Box 1. The truth about active denial technology • There is only one electromagnetic spectrum. Nuclear weapons release a great deal of ionizing radiation in the high frequency range above visible light, where the energy of the radiation is capable of breaking chemical bonds.

Bioelectromagnetic Weapons - Science in Society

where C_p is the heat capacity at constant pressure, \hat{H} is the heat changing term when the reaction proceeds, $\hat{\beta}$ is the thermal expansion coefficient and V is the volume of the system. According to the theory on flow in a reactive medium, parameter \dot{f} reflects the rate of transformation of chemical bond energy to molecular and bulk translation energy. Note that the parameter \dot{f} is ...

Thermobaric and enhanced blast explosives (TBX and EBX)

The Cyber Initiative is meant to be time-limited. An initial five-year, \$20 million-dollar commitment made in March 2014 was supplemented in November 2014 with an additional \$45 million in grants to the Massachusetts Institute of Technology, the University of California, Berkeley, and Stanford University to establish multidisciplinary cyber policy centers on their campuses.
