Home Lab 5 Refraction of Light Overview: In previous experiments we learned that when light falls on certain materials some of the light is reflected back. In many materials, such as glass, plastic, or water, the light also goes through the material or body. For example, I can see my face when light is

Common examples are reflection of light, as shown in figure 2-1, as well as reflection of surface waves that may be observed in a pool of water, or sound waves reflected as echo from a wall. Reflection of light may be specular or diffuse. The first occurs on a blank mirroring surface that retains the geometry of the beams of light.
