WHEN THE SEAS RISE GLOBAL CHANGES AND LOCAL IMPACTS

when the seas rise pdf

Flood control structures (U.S.) Levees, walls, dams or other features may protect some areas, especially at lower elevations. Levees and other flood control structures are included in this map within but not outside of the U.S., due to poor and missing data.

Climate Central - Surging Seas: Risk Zone Map

Key findings. By 2035, about 170 communities—roughly twice as many as today—will face chronic inundation and possible retreat from affected areas under the intermediate or high scenarios, with more than 100 seeing at least a quarter of their land chronically flooded.

When Rising Seas Hit Home: Hard Choices Ahead for Hundreds

Since at least the start of the 20th century, the average global sea level has been rising. Between 1900 and 2016, the sea level rose by 16–21 cm (6.3–8.3 in). More precise data gathered from satellite radar measurements reveal an accelerating rise of 7.5 cm (3.0 in) from 1993 to 2017, : 1554 which is a trend of roughly 30 cm (12 in) per century.
