works critical of scientology pdf

Scientology is a body of religious beliefs and practices launched in May 1952 by American author L. Ron Hubbard (1911–86). Hubbard initially developed a program of ideas called Dianetics, which was distributed through the Dianetics Foundation. The foundation soon entered bankruptcy, and Hubbard lost the rights to his seminal publication *Dianetics: The Modern Science of Mental Health* in 1952.

Scientology - Wikipedia

The Church of Scientology is a multinational network and hierarchy of numerous ostensibly independent but interconnected corporate entities and other organizations devoted to the practice, administration and dissemination of Scientology, a new religious movement. The Church of Scientology International (CSI) is officially the Church of Scientology's parent organization, and is responsible for ...

Church of Scientology - Wikipedia

The first huge lie. Scientology cannot get 100 people rounded up for a cataclysmic hurricane in Puerto Rico or Houston. A "network" of 1.5 million people! If they were asked to provide proof of this they would no doubt come up with some contrived stories about "training 200,000 people in India to do assists" and how their "network" includes the Red Cross because there was a Red ...

The more I read about cryonics "i.e. freezing yourself after death" the more I realized it's something we should all be talking about.

Why Cryonics Makes Sense " Wait But Why

Update (1/3/18) I've been overwhelmed with requests for the shorter guide, and the email address below

no longer works. So I've uploaded a copy of the guide for anyone to download and share here: How to read and understand a scientific article. Please feel free to use it however you wish (although I'd appreciate being credited as the author).
